Short Description

Supports brain health by protecting against inflammation, environmental and metabolic oxidative stress, and by enhancing blood flow and neurotransmitter function. May improve cognition and reduce cognitive decline.

Description

Neurological functions are based on the conduction of electrical signals along nerves, and across nerve synapses. There are many factors which can harmfully impact these neurological functions; chemical and environmental contaminants, systemic inflammation, pharmaceutical side effects, and the natural aging process.

These factors can be difficult to mitigate, and most medical solutions attempt to address the symptoms more than they address the causes. Research into the phytochemicals associated with the ingredients of this formulation has shown that neurological degeneration can be reduced and neurological functioning can be enhanced, thereby addressing the root causes of neurological disorders rather than merely their symptoms.

Suggested uses

The following uses have been published for one or more of the ingredients of this product;

Alzheimer, Anxiety, Brain, Cognition, Depression, Diabetes, Encephalomyelitis, Energizing, Epilepsy, Inflammation, Memory, Nervine, Neuropathy, Parkinson's disease, Stress

How to use

Place one measuring teaspoon in a tea infuser or a fold over teabag (available for purchase). Pour eight (8) ounces of very hot (boiling) water over the infuser or tea bag and allow it to steep for five to ten minutes. Drink when cool enough.

Properties

The following properties have been identified for one or more the ingredients of this product;

Adaptogen, Alterative, Antiarthritic, Anti-inflammatory, Antineuralgic, Antioxidant, Antiphlogistic, Antipruritic, Antirheumatic, Immunomodulation, Memory enhancement, Resolvent, Tonic, Vasodilator

Precautions

Not recommended for use while pregnant or nursing. Generally recognized as safe for human consumption.
