

Breeze whole body stick deodorant

Availability: In Stock
Weight: 0.00oz

Price: \$5.00

Short Description

Breeze is an effective and healthy alternative to traditional deodorants, and can be used on any part of the body.

Description

Body odor is usually caused by bacteria living on the skin that break down normal body oils and perspiration. Typical deodorants try to mask those odors, and anti-perspirants attempt to stop the body from producing perspiration by using potentially harmful chemicals. Breeze breaks free from those traditions by preventing the growth of the bacteria that cause odor, while at the same time feeding the skin to keep it healthy.

Typical odor-producing areas like the underarms or leg axils are also home to concentrations of lymph glands, and any product used in those areas may introduce chemicals that can be harmful to the whole body. Breeze does not use any of those chemicals, which may protect you from the harm that they might cause.

Compare Breeze to Lume or Mando.

Suggested uses

The following uses have been published for one or more of the ingredients of this product;

To prevent the development of body odors caused by bacteria.

How to use

Apply where desired to reduce the development of body odors.

Properties

The following properties have been identified for one or more the ingredients of this product;
