

Gastro-Intentional C

Availability: In Stock
Weight: 0.00oz

Price: \$7.00

Short Description

An herbal powder developed to ease gastrointestinal irritation associated with Crohn's, Colitis, IBS, or others.

Description

Gastrointestinal disorders can have a significant impact on one's quality of life. While there is no known cure for these disorders, there are options available to reduce the severity or frequency of flare-ups.

Pharmaceutical solutions seek to suppress the body's natural inflammatory response, but carry significant risk of side-effects. Gastro-Intentional C, however, has been developed to naturally soothe the lining of your digestive system, reduce gut leakage, and reduce inflammatory outbreaks when used regularly as directed.

Suggested uses

The following uses have been published for one or more of the ingredients of this product;

Detoxify, Digestive system, Kidney, Liver, Peptic ulcers, Ulcers

How to use

Each morning, mix one measuring teaspoon of the powder with one-half cup of organic yogurt that has live probiotic cultures, and stir until uniform. Consume as-is, or add other ingredients (such as cereals) to the mixture to make a complete breakfast, depending on your personal tolerance to those ingredients. Alternatively, Gastro-Intentional C can be added to a smoothie mixture of your choosing.

The powder is not soluble in water or juice because it is important to consume the plant material in its unaltered state to gain the greatest benefit. It can be stirred into a liquid if you desire, but it will separate fairly quickly
