

Fantastic Foragers Presents The Art and Science of Foraging

Foraging for edible or medicinal plants has a history as old as humanity:

Then God said, "I give you every seed-bearing plant on the face of the whole earth and every tree that has fruit with seed in it. They will be yours for food."
Genesis 1:29

Join us for a presentation about the art and the science of foraging for edible and medicinal plants in Ohio. We will be sharing information about how and where to find valuable plants, why they are valuable, how to use them, and how to preserve them for later.

Wednesday, June 12th, 7:00 PM, at Ohio Freedom Fighters,
4237 Beck Road, Medina, Ohio, 44256.

About the presenter

Geoffrey (Geoff) Rapp has been a life-long resident of northeastern Ohio, and has an enduring love and respect for the biodiversity of the region.

Geoff's education includes a B.S. degree in science, Ohio teacher certification, and an M.B.A., all received from Universities in Ohio. Geoff continues his lifelong love of learning through continuing education programs as an Ohio Certified Volunteer Naturalist, an herbalist, and a Native Plant Specialist.

Geoff applies his love of nature by volunteering for the Medina County Park District, providing informational and training programs to public groups, leading forays to learn about the edible and medicinal values of plants, and formulating plant-based personal care products for sale through his company Fantastic Foragers.

From exploration to education to utilization, Geoff is committed to helping others experience all of the benefits that nature has to offer.

- Fantastic Foragers makes and sells products that are made using only plants or plant-derived materials.
- Herbs have been safely used for centuries by indigenous peoples, traditional medicine practices, and herbalists.
- A sampling of Fantastic Foragers products will be available for purchase at this event.
